PROFESSIONAL SUMMARY

SOC-focused cybersecurity professional with hands-on experience investigating phishing and malware alerts using SIEM logs and endpoint telemetry in virtual lab environments. Skilled in Windows Event Log analysis, Linux systems, networking fundamentals, and alert triage. Experienced in incident documentation and false positive analysis, with a structured, evidence-driven approach to threat investigation.

TECHNICAL SKILLS

Security & SOC: SIEM log analysis, alert triage, phishing analysis, Malware sample analysis

Tools & Technologies: SIEM – Splunk, Virus Total, Git, GitHub, windows Event viewer, Linux, Kibana, Elastic search

Networking: TCP/IP, DNS, HTTP/HTTPS, basic traffic analysis, Topology

Incident Handling: Basic incident classification and escalation awareness, and Compliances, MITRE ATT&CK basics

PROFESSIONAL EXPERIENCE

Intern – Liku Tech (*2 months*)

Assisted in preparing technical documentation and structured reports, ensuring clarity and accuracy for internal project tracking. Supported workflow planning and task coordination across teams, gaining exposure to operational processes and professional communication.

SECURITY PROJECTS

Windows Authentication Log Analysis - ([Link](#))

- Analysed Windows Security Event Logs to identify repeated failed login attempts, abnormal patterns.
- Assessed alert severity based on impact and documented investigation findings.

Security Home Lab Environment - ([Link](#))

- Designed and deployed a virtualized lab environment using 3 Different OS to simulate enterprise security scenarios
- Closed Multiple alerts and in different severity in Simulated platforms with playbook and Documentation

Phishing Email Investigation - ([Link](#))

- Analysed full email headers to identify sender spoofing, SPF/DKIM misalignment
- validated indicators of compromise (IP, URLs, Domains) using threat intelligence platforms.

Elastic SIEM with Sysmon Threat Monitoring - ([Link](#))

- centralized SIEM using Elastic Stack (Elasticsearch, Kibana, Fleet Server)
- Enabled real-time log ingestion, process monitoring, and security event detection for incident response.

EDUCATION

Bachelor of Engineering - Electrical and Electronics Engineering

2021-2025

Velalar college of Engineering and Technology (*Anna University*)

CERTIFICATIONS

- SOC Analyst L1 – Let's Defend
- Certified Data Center Operations, Security – IIT Madras
- Cybersecurity Professional Certificate – Google
- Networking & Linux – Cisco

Location: Tamil Nadu – Erode | Willing to Relocate to Required Location
